NIN

NEXT IN NETWORK WHITE PAPER (V.1.1)

TABLE OF CONCEPT

1.PROBLEMS AND SOLUTIONS

The rapid growth of the Internet and the proliferation of smart mobile devices has brought people more exposure to cryptocurrencies, with the report of (leading digital money retrieval platform world). The capitalization of all digital currency platforms as of now is 1700 billion USD. Binance, Huobi, Coinbase, Okex are the No.1 crypto exchanges in the world with billions of dollars a daily trading volume. This has demonstrated the strong attraction and confidence in digital currency growing people. The talented investors in the world started to pay attention. And the famous brands in the world began to pay with Bitcoin, Ethereum... Although the users of these services tend to increase with a rapid rate, most people cannot make money from it. So NIN Blockchain is a platform that provides stable, fast, and popularizes digital currency knowledge to users for free. Instead of chargin fees and forcing users to spend their money to buy digital money, NIN Blockchain creates a free platform in which users only need to do the tasks. Rewarding content creators who share the NIN platform... We will receive NIN Crypto in return and its increase in price, which is the value of our efforts.

2.WHAT IS NIN BLOCKCHAIN? –

 NIN (NEXT IN NETORK) Blockchain is a cryptocurrency sharing platform operating on a Blockchain platform, and owning NIN is free. NIN stands for Token Interest Rate Global. NIN is a Decentralized Autonomous Organization (DAO), which activities are largely automated by rules and principles regulated into cryptography without human involvement.

3.VISION AND MISSION

The ambition of NIN is to bring the knowledge of digital money to everywhere in the world, make transactions more convenient. The further goal is to develop a network of private, professional, and worldwide blockchains. All participants can sign up for free and make money since this is a tool that was created for the absolute novice and professional traders.

4. ORGANIZATIONAL VALUES

 The year 2021 is predicted to be a very difficult year for all businesses and individuals worldwide, and we are adversely affected by the Covid-19 epidemic. Economic recession, war escalation, and violence are everywhere. One of the things we need to do is minimize the impact of recession and disease. Realizing this is a very important factor Interest Rate Global into the NIN Foundation and NIN application to solve the work of all of us and free time, turning them into money.

5.BUSINESS MODEL

However, to do that, we need everyone to share this app, making it globally popular. The reward for sharing and connecting is the NIN Token, and the value of NIN increases as there are many people in the same possession. Note that it's free for you and everyone.

6. THE NEXT IN NETWORK PLATFORM

Next In Network is the world's most innovative next generation mobile mining solution provider. We are making it possible for anyone in any place around the world to mine with a mobile phone. Our solution is a low-cost energy system that thrives on blockchain technology. At Next In Network, we care about making life easier for people. This is why we are developing the mobile mining solution. With Next In Network token, token holders can have access to some competitive benefits. We aim to provide token holders with accessible technology and the business of cryptocurrency mining. We believe in the success of this project as we truly decentralize mining profits and bring the whole idea of mining back full circle to its roots and core principles of mass empowerment and independence.

7.THE NEXT IN NETWORK TOKEN

The next in network token will be launched on the Next In Network platform and entitle token holders to mine more tokens. An Next In Network wallet and a detailed statistics dashboard will be available on the project website. New tokens will be issued through mobile mining. Next In Network will represent the bearer's right to the mining reward share and do not represent any stake or voting rights in the company. We will make the token available on various exchanges to enable token holders to exchange Next In Network token for other tokens

8.NIN MINING APP ECOSYSTEM

MINER

This is a user of the Next In Network mobile app whose job is to confirm that he/she is basically not a "robot" daily. This user validates his/her presence every day as he/she must open the app every 24 hours to continue earning NIN tokens for free. A Miner can make the base rate of 2 NIN tokens per hour, which can be broken down to 1, 0.5, 0.25, 0.20, 0.15, 0.10, and 0 in line with the user base growth. By logingg into the mobile app every 24 hours and clicking the mining button, users participate.. many mining platforms, there is no need for a vast amount of energy to mine. In NiIN tokens We have simplified the method to make it possible on the smartphone. Anyone with a

smartphone and the next In Network app can automatically earn an hourly mining rate by clicking the mining button. Each mining session automatically ends after 24 hours. Each miner is expected to open the app and click the mining button daily to keep earning.

AMBASSADOR

This is a user of the Next In Network who actively introduces other users to the Next In Network platform. The value of the Next In Network token increases as the community expands. This will be crucial for later updates of the mobile app where members engage in the transaction of goods and services with the earned Next In tokens. A ambassador can refer new users to join his/her earning team. For each active member in a team, the Keeper will earn an extra 25% base rate as a recommendation bonus. If a ambassador has 10 members in his/her earning squad and all of them are actively mining, the ambassador will earn an extra 10 x 25% = 250% NIN tokens of the base rate. This means that ambassador earn 25% of whatever their teammate mine every each day. Therefore, the key to making more Eagle tokens is to invite more new miners to join the mining team and remind them to log in daily for mining activation.

9.Roadmap

Our ongoing mission will be to upgrade and expand the platform as much as possible through the reinvestment fund and the influx of fresh capital from token sales. We want to be in a constant process of building, expanding, and updating our platform capabilities.

We plan to grow the Next In Network platform exponentially over the years. This will allow us to bring the idea of further decentralization of mining ownership to a new level, with projects such as a new concept of competitive mining pool and miner management software.

ROADMAP –

WEB-1
• Project Inception
• Core Team Formation
• NIN Ecosystem Concept
• Mobile Mining App Launch

WEB-2
- KYC Compliance
- Launch NIN Token
- Swap to NIN Token
- Crypto Wallet Launch

WEB-3
- Staking
- Liquidity Pool
- Token Economy
- Exchange Listing & Listing on Coin Market Cap
- Blockchain Development

WEB-4
- Partnerships
- Smart Contracts
- Project Academy
- NIN Coin Blockchain
- Decentralized Applications

10.Swap/Burn

We understand the importance of scarcity of supply NIN miners will use NIN Tokens to stake and mine NIN Coin. NIN Coin is the blockchain asset that comes up from WEB 3 to WEB 4. At the time of un-stake the pooled NIN Token will be burned NIN Coin will have a starting supply of 20 Billion.

NIN Coin team will setup planned burning of NIN Coin to further reduce the supply and add more value to holders who share the vision, and are supporting the development. Users will receive NIN Coin in phases, in a form of mining within the crypto wallet which further promotes the mining experience and engagement so as to prevent flooding at once, and acts as a stability feature as well. The Web 1 of the mining will have a higher supply rate. Users can stake for long term to receive daily rewards. This facilitates slow release of supply in the market and will support scarcity.

11.Conclusion

Next In Network has been created as a platform that will revolutionize the cryptocurrency world. Everyone can tap into and benefit from the digital assets that Next In Network has to offer. This platform is beneficial to traders, investors, miners, and many people looking for an alternative way to enter and earn from the cryptocurrency market.

Next In Network is not just a coin, app, or cryptocurrency. The team is fully committed to helping anyone in the world to take advantage of blockchain and cryptocurrency. We are simplifying mining, making it possible with your mobile phone. We are developing the next-gen crypto ecosystem that would bring about great changes to the crypto market.

If you want to be a key part of the future of cryptocurrency or explore the benefits of the Next In Network, join the platform now and be a part of the next next-gen global mining ecosystem designed to transform the cryptocurrency market through a low-cost, energy-saving mobile mining solution, By using and registering on the NIN Mining Application you are in agreement to the Privacy Policy and Terms of Services.
